

Index

- adjugate matrix, 78
- Arnoldi process, 30
- ascending sequence, 8, 123
- backward stability
 - and turnovers, 17
 - companion pencil, 92
 - first results, 20
 - matrix polynomial, 99
 - of deflation, 46
 - of Francis's algorithm, 51
 - unitary-plus-rank-one case, 72
- bulge chasing, 25
- cache, 52, 60
- Cayley transform, 81
- CMV matrix, 112
- colleague matrix, 84
- companion matrix, 60
- companion pencil, 91
 - block, 95
- comrade matrix, 84
- condensed form, 107
 - defined, 113
 - proper, 113
 - twisted or zigzag, 114
- core transformation
 - defined, 3
 - nontrivial, 11
- decomposition, QR, 2
- deflation, 26, 34, 46
 - aggressive early, 52
 - singular case, 49
- descending sequence, 8, 123
- eigenvalue
 - of matrix polynomial, 94
 - of pencil, 89
- extended Krylov subspace, 133
- Faddeev–Leverrier method, 79
- floating-point standard, 14
- flop, 1
- fusion, 7
 - details, 15
- Hessenberg matrix, 1
 - generalized, 107
 - inverse, 111
 - proper, 11, 23
- Hessenberg-triangular form, 89
- IEEE binary 64, 14
- implicit-Q theorem, 26, 31
- inverse Hessenberg form, 111
- Krylov matrix, 35
- Krylov subspace, 29
 - extended, 133
- less sim symbol \lesssim , 20
- limb, 123, 129
- main sequence, 123
- matrix polynomial, 94
- misfit, 39
- Moler–Stewart algorithm, 89
- multishift algorithms, 45, 120
- overflow, 13, 14
- pencil, 89
 - companion, 91
- polynomial
 - matrix, 94
 - orthogonal, 84
 - scalar, 60, 84, 90
- position vector, 112
- simple interpretation, 114
- power method, 26, 29, 30
- QR decomposition, 2
 - and Francis algorithm, 35
 - by core transformations, 105
- QZ algorithm, 89
- Rayleigh quotient shift, 40
- regular
 - matrix polynomial, 94
 - pencil, 89
 - roundoff, unit, 14, 20, 45
- shift through, 9
- shifts, 23, 41, 138
 - rationale for, 33
 - Rayleigh quotient, 40
 - Wilkinson, 41
- stability, *see* backward stability
- subspace iteration, 26
 - with changes of coordinate system, 27, 136
- turnover, 8
 - as RQ to QR decomposition, 17
- twisted form, 114
- underflow, 13, 14
- unit roundoff, 14, 20, 45
- unitary eigenvalue problem, 59, 139
- unitary-plus-rank- k matrix, 102
- unitary-plus-rank-one matrix, 60
- upper Hessenberg matrix, 1
- Wilkinson shift, 41
- zigzag form, 114
